HYDRAULIC FITTINGS

TM

We deals in all type of Hydraulic Fitting items such as Couplings, Weld Fittings, Hose Fittings, Adaptors, Plug & Ends etc. These Hydraulic fittings are parts used to connect hoses, pipes, and in hydraulic systems tubes. Hydraulic equipment generally operates under high pressures and is often not a fixed system. These fittings typically adhere to strict standards which dictate fitting construction, dimensions, and pressure ratings.

Coupling; Coupling is a device used to connect two shafts together at their ends for the purpose of transmitting power. The primary purpose of couplings is to join two pieces of rotating equipment while permitting some degree of misalignment or end movement or both.

Nominal Pressure rating for Couplings (o.d.)
