V-Belts

TM

Poly V-Belts; We deals in all range of Poly-V auto belt, are comes with more Compact configuration, high transmission capability, thin belt body, high flexing capability and anti-heat, anti-oil, anti-wearing and little pre-tensioning required during the service. Poly-V belts, have high transmission ratio because of tooth of poly-V belt. So they have high transmission power about 30% - 50% higher up than normal V-belts and it have lower vibration, Oil and Heat resistance and save space.

Poly-V belts covers the five cross sections and pulley groove dimensions.

PH - Fractional Horse Power belt for very light duty applications.

PJ - Low cost belt for light duty applications.

PK - Designed specifically for the automotive, it is also suitable for Machine Tool drives, etc.

PL - Medium duty drive belt covering a wide range of applications.

PM -High performance makes this belt unrivalled for heavy-duty applications.

Low stretch belt. The continuous high tensile synthetic cord makes maximum utilization of the face width and ensures a uniform tension through the belt.
