"INDER" brand is also famous and well known for quality in each and every nook & corner of India. We supply the goods in all over India besides various Govt. & Semi Govt. Departments we are having Rate contract in most of the Govt. Departments and now our few Products have become ISI marked and CE certified. The Company feels its privilege and is proud of its endeavour in the past. In the manufacturing of pipe tools viz Ratchet Pipe Threader, Pipe Cutters, Hydraulic Pipe Benders, Pipe Wrenches, Chain Wrenches, Under Pressure Drilling & Tapping Machines, G-Clamp, Pipe Vice with stand, Hammers, Spanners, Drain Cleaners & Measuring Tools etc., we hold some account. This has been possible by keeping abreast of developments in mechanical trade and constantly adding to the manufacturing trade and constantly adding to the manufacturing programme of new tools and appliances. Each Product is subject to vigorous quality inspection at each stage of production and tested for performance under extreme working conditions.

Our company is in its best form in the field of *Hotel Business, Styled Hotel Inder Prasth, Education and Immigration Services and successfully clinching the deals of Real Estate and Land Development activities.* In this world of topsy turvy, the canonical activities of the company are the talk of the town and in credentials of the company are being highlighted by the fourth estate time and again.

138. O.D. COLD PIPE CUTTING & BEVELING MACHINE

O.D. Cold pipe cutting and Beveling Machines are portable out-mounted, lighter weight, minimal radial space, easy to operate. These machines are widely used in the fields of petroleum, chemical, natural gas, power supply construction boiler, nuclear power plant and ship repair etc. Automatic feed mechanism, no manual-adjustment, high efficiency, high quality. Mounting in on time, can be used for cutting and beveling at the same time. Machine body is toroidal cavity construction can be divided two parts, installed at any space on the pipeline quickly and steadily. It can be used for cutting and beveling process of different types and sizes of pipes, pressure vessels and steam generator, safety and quickly. Different beveling shapes are available as per customer requirement and it is used for treatment of pipes material: different grades of Carbon steels, Stainless steel and alloys. Cold cutting process will not influence the quality of the material of the pipe and working range available size 10 to 1500mm in standard metric system and British system are available as per pipe specifications. Machines are available with Electric, Pneumatic and Hydraulic driven.

139. I.D. COLD PIPE BEVELING MACHINE

The I.D. mounted beveling operation utilizes and expandable mandrel which is slide into the open end of the pipe. A draw nut is tightened which expand the mandrel blocks up a ramp and against the I.D. surface for positive mounting. Self centered and squared to the bore. As the tools bit is fed into the material from the end, a bevel is produced which conforms to the angle predetermined by the angle ground into the bit. Bits are available for practically and material or beveling angle required, and bits can be custom made for any form tooling operation. The application of the machine at Nuclear power, Fossil fuel/Power, Oil and Gas, Fabrication/High purity, Process plants and ship repair etc. Machines are available with Electric and Pneumatic Drive on request on same cost.

Beveling Machine is suitable for beveling of plates, pipes at a speed of 2.6M/Min. with 12mm depth in 6-40mm min. thick, mild steel/aluminium material/10mm thick stainless steel & Tube Beveling Min. inner dia 100 mm. Standard machine is provided with 30° bevel angle device. 37.5°, 45° and other varying device can be supplied at an extra cost. This preparation of weld edge is required before welding in fabrication workshops, boiler construction equipment, shipyards, pipeline, tank, heat exchanger and machinery manufacturers etc. The beveling operation by this machine is superior, cheaper and faster than any other methods such as flame cutting.

How Beveling Machine with Milling Operation is better than Flame Beveling :-

1. Milling cutters bevel, clean accurate angular edge on straight or circular section.
2. Once the cut starts, the cutting force will propel either the machine or the job whichever is lighter.
3. As machine is self propelled, one operator can control beveling operation.
4. More accurate bevel angles, saves grinding/reworking cost. Np. thermal distortion.
5. Bevels at 2.6 M/Min which is much faster than flame cutting speed of 0.3M/Min.

557. RAILING BASE FLANGE

Ideal when a structural fixing is required for guard rail and balustrades. The holes are of sufficient diameter to insure proper fixing with either mechanical or chemical anchor. The two set screws in the vertical socket give greater side-load stability to the upright. It is recommended that the fixing holes in the flange should be in line with the applied load.
